

There are numerous genealogy sites on the internet. We have no connection with any of them, but we like this one: just click on your last name and it will bring up your Blackfeet relatives of the same last name. Then you can search further by clicking on additional names to see parents, children, etc.

*If there is sufficient interest, as a free service to Tribal members we may subscribe to a fee-based genealogical service which would allow members to search in greater detail and more easily construct their family trees. Just send us a message if you are interested.*
